**Boxhill Institute** • March 2021 - July 2021

- Designed and demonstrated Microsoft Active Directory Domain Lab for box hill Institute using server windows 2016 as the domain controller inside VMware vSphere Environment.
- **Skills Learnt:** Domain Controller Administration, Group Policy Objects, Network, Storage Server (NAS), SMB, FTP, PowerShell (basic).

---

## SKILLS

**Networking, Switching, Routing, OSI Layers, Firewalls, DNS, DHCP, VPNs.**

**Vulnerability Scanning and Forensic, Nessus, Nmap, Sysinternals, Wireshark, SPLUNK (Basic)**

**Windows/Linux Operating Systems and Servers, ADDS, MS 365**

**Virtualization, Cloud Computing**

**Scripting and Programming (Bash, Python, JavaScript)**

**Web Development and Project Management Techniques, DevOps/DevSecOps**

---

## EDUCATION

### Professional Year

• **Education Center of Australia (ECA) • Melbourne, Australia (Feb 2023 – Current)**

Subjects: Professional Development, Workplace Culture

### Bachelor of computer systems

• **Boxhill Institute • Melbourne, Australia (Feb 2020 – Feb 2023)**

Key Subjects: Network and Network Security, System Administration and Cybersecurity, Virtualization, Cloud Computing, Web Application Development, Entrepreneurship and Innovation, Project Management, Internet of Things, Computer Forensics, OOP-Python

---

## INVOLVEMENT

---

### AISA, ACS

Australia • Member • October 2022 - Present

- Member of different computer organizations such as Australian Information Security Association and Australian Computer Society with an active participation in Networking events and Volunteering Activities.
- Developed Networking, Public Speaking, Event Managements skills.

### TCM Security, LinkedIn Learning

Student • February 2022 - Present

- Engaged in different Online Platforms to keep myself up to date with my technical learning activities obtained more than 15 certificates of completion in different specifications.
- Learned about emerging technologies, SMART practice of technology for key their key usage and aspects in business requirement.

---

## CERTIFICATIONS

---

### Security Plus - SYO(601)

CompTIA • 2023

- Comprehensive understanding of network security concepts, protocols, and best practices, proficiency in risk management, vulnerability assessment, incident response, and implementing security controls to protect systems and data.
